Acknowledgement for Cover Design
Prostaglandin conformation redrawn from figure 1, I. Rabinowitz, P. W. Ramwell and P. Davison Nature New Biology 233: 88, 1971.

Notice to Contributors

Papers will be published monthly, in English, by a process of photographic reproduction which will allow publication dates of 30-90 days from receipt of manuscript. The quality of the reproduction will depend largely, therefore, on the authors' preparation of the original text. Contributions of several types are solicited in all areas of prostaglandin research.

A. Original research (two complete copies)
These papers should be as concise as possible yet giving complete descriptions of methods not previously in print. An abstract must be included as part of the title page with acknowledgments, if any, listed below. The text may be organized to best suit the work to be described but should be typed single spaced with an electric typewriter and a carbon ribbon on good quality bond confined to an area 6 x 9 inches (15 x 23 cm).

1. Illustrations (photographs, drawings, diagrams, charts) should be clear, easily legible and grouped to fit the page; these should not exceed 6 x 9 inches (15 x 23 cm) including legends and are to be numbered in one consecutive series of Arabic numerals. Illustrations must be in black on a light background. Glossy prints showing high contrast are preferable to original art work.
2. Tables (6 x 9") must be concise, as simple as possible and numbered consecutively using Roman numerals. It is suggested that figures and tables be pasted directly on the manuscript page in the appropriate place.
3. Only essential references should be listed and the number reduced by citation of recent reviews. References should be indicated by consecutive numbers in parentheses in the text and listed sequentially in the bibliography. Abbreviations for journals should be those used in the Index Medicus. Example of format for (a) a periodical, (b) a book and (c) a chapter in a book follow:
   (a). Bergstrom, S., M. Hamberg, and B. Samuelsson. Absolute Configuration of the Prostaglandins, Nature 212:38, 1966.
   (b). Ramwell, P. W. and J. E. Shaw, editors, Prostaglandins, Interscience, New York, 1968.
   (c). Karim, S. M. M., in Prostaglandins, Peptides and Amines (P. Mantegazza and E. W. Horton, Editors) Academic Press, London, 1969, p. 65.

B. Work in Progress: Reports of current research findings of potential significance, the full description of which will follow completion of the study.

C. Comments: Readers are encouraged to send comments on previous papers, editorials, matters of current interest or speculative thoughts and theories on future directions of research. In this section we would hope to stimulate meaningful discussions on matters of topical interest across disciplinary lines and provide a forum for comment and debate. These items will be retyped by the editorial office and returned to contributor for review prior to publication.

D. Reviews: Contributions are encouraged for this section on any subject stressing new concepts as well as covering the pertinent literature.

E. Announcements of future meetings and items of interest should be submitted as far in advance of the event as possible.

Manuscripts should be submitted to

PROSTAGLANDINS
333 Cedar Street
New Haven, Connecticut 06510
USA

REPRINTS
(without covers only)

Reprints should be ordered when the manuscript is accepted — a purchase order is required. Reprint orders are accepted in multiples of 100.

PRICE SCHEDULE
Effective Jan. 1974

Quantities	No. of Pages 1-4	5-8	9-12	13-16
100	$27	$40	$ 54	$ 70
200	35	52	73	96
300	42	64	91	122
400	50	79	108	148
500	58	91	125	174
600	65	103	142	190
700	72	115	159	206
800	80	127	171	222
900	88	139	183	238
1000	95	151	195	254
